Portugal Eco Rally

It was in 1902 that we began to write the history of auto racing in Portugal. Over a hundred years of motorsport have passed, which has put our country at the top of the automobile competition, especially for the excellence of organized events.

When in Portugal, we broke records of electricity production from renewable sources, it is time to open a new chapter in motorsport history with the first competition for electric cars.

The Classic Clube de Portugal decided to start writing the future in an ambitious proposal where he proposed to the FIA the organization of the 1st Portugal Eco Rally, integrated in the "FIA (International Automobile Federation) - Electric And New Energy Championship"

This event is 9 and 10 June, 2018.

PERMANENT SECRETARIAT UNTIL THE DATE OF THE EVENT

Classic Clube de Portugal
Rua do Parrinho, nº 303
3700 - 217 São João da Madeira

SECRETARIAT DURING THE EVENT

Jardim do Palácio do Marquês de Pombal
Largo Marquês Pombal,
2784-540 - Oeiras

Declaration of Environmental Responsibility

Within the scope of the FIA's Environmental Certification System, Classic Clube de Portugal assumes the socio-environmental commitment as organizer of this event, valuing it as a recognized social capital factor as a promoter of integration and social mobility, involving a wide range of partners, organizers, participants, sponsors, media and public. This sporting event is considered a privileged vehicle of information, creating relationships of trust that mobilize individuals in the pursuit of responsibilities and shared goals, in order to reduce the environmental impacts caused by the event.

In doing so, all efforts will be guided by respect for principles:

- Comply with all environmental laws and regulations and other requirements
- Publicize and promote environmental knowledge among the different agents (organization, pilots and all teams involved, and spectators);
- Seek cooperation, partnership and exchange with environmental agents;
- Reduce as far as possible the environmental impact with regard to transport by encouraging the use of public or other transport;
- Prefer, whenever possible, renewable energy sources;
- Continue to implement measures and establish partnerships to increase and improve the selective collection of waste as well as the correct and proper disposal of waste;
- Promote and improve our environmental responsibilities based on structured and planned tasks;
- To minimize the number of documents printed on paper, giving priority to the use and consultation of documents in digital formats;
